# WELCOME

Welcome to Wattle Grove and the Rockin' at Rocky Sale for 2024

The last three years have gone so quickly, it's hard to believe we are already heading back to Rockhampton for Beef Australia.

The Beef Australia event and our Rockin' at Rocky Sale are a significant event in our program and we put a lot of planning and effort in being able to have the cream of the crop on offer.

We have selected the sale draft from a large contemporary group of bulls and females to offer cattle that are of the highest quality and suited to the most astute buyers. They have been grown and prepared in Queensland since November 2023. They have completed the WG Accreditation program, been blooded, vet checked, semen tested and are ready to make an impact in your program.

Since our first sale at Beef Australia in 2012 we have seen the positive impact that Speckle Park has on Queensland herds. Providing low birth weight vigorous calves, increased weight gains, hybrid vigour and exceptional meat quality all in a super consistent, hardy package. We invite you to visit us at Beef Australia Sites O92-O95 and discuss what Wattle Grove Speckle Park can do for your program.

All sale cattle will be available for inspection for the duration of the event.

The sale will take place onsite 6pm, Wednesday 8th May at sites O92-O95 with online bidding available via Stocklive Elite.

Wattle Grove is proud to partner with Beef Australia 2024 and provide the opportunity to purchase great cattle, meet with great people and have a good time.

We look forward to seeing you at Beef Australia, Rockhampton in May.

Cheers

The Wattle Grove team

*Henry, Hugo, Dale, Bin, Max and Claudia.*

## WHEN YOU GET YOUR CATTLE HOME

Speckle Park cattle have a very strong herd instinct. For some of these animals it will be the first time they have been separated from their mates and that can cause stress and unusual behaviour. We recommend having appropriate cattle in the yards to welcome your purchased cattle home. We also recommend learning about our temperament scoring system to ensure you purchase an animal suited to your program. Details can be found on page 4.

# WATTLE GROVE ACCREDITED

## INTRODUCTION:

The Wattle Grove Speckle Park Accredited program is a proprietary grading system that focuses on phenotype, temperament, and saleability.

Developed over the many years of breeding and selling Speckle Park and underpinned by industry accepted standards, Wattle Grove Accredited gives buyers the peace of mind that all animals, genetics and meat with the Wattle Grove Accredited tick have been assessed and meet the highest industry standards.

The focus in our breeding program has always been on structural integrity, longevity, production, and temperament. Strong herds are built on strong foundations and there is no denying that the structure of any animal is the foundation their production is built on. No figures in the world can fix bad feet or a weak spine.

As part of the accreditation program cattle are assessed on 16 physical attributes including structure, condition, muscle scoring, reproductive development, outlook and saleability to achieve an overall average score from 1 to 6. 1 being excellent and 6 being very bad. This number becomes the Wattle Grove Accredited Score.

Temperament is assessed and is provided as a stand-alone score. This allows for complete transparency on an individual animal's temperament.

Wattle Grove Accredited animals are required to conform to structural requirements to ensure high levels of mobility, production, and adaptability to their environments. As a result, they have the potential to be more efficient and profitable as a production animal and they should thrive in a reproduction setting with increased longevity and profitability.

The assessment process and score allow cattle to be assessed objectively to assist with breeding, culling, and purchasing decisions.

With a focus on excellence and commitment to the highest standards of quality and integrity, we believe the Wattle Grove Speckle Park Accredited program is an excellent tool for anyone involved in the buying, breeding, management, or sale of Speckle Park cattle.

On each lot in the sale, we have provided the 16 individual accreditation scores along with the WG Accredited Score. This is then supported by scan data and genomic testing. Extensive descriptions of each trait can be found in the Wattle Grove Accredited Guidebook on our website.

We invite you to take the time to read the Wattle Grove Accredited Guidebook and use the information to assess the sale lots yourself.

We welcome your feedback as we continue to fine tune the system.

## TEMPERAMENT TABLE

Score	Description	Explanation
1	<b>VERY QUIET</b>	<b>Broken in, pat in the paddock</b> -These will be show stock or animals that have been handled their whole life. A temp score of 1 is hard to achieve.
2	<b>QUIET</b>	<b>Possibly pat in the paddock, broken in to lead</b> -Can suit smaller operations, regular handling and can adapt to smaller herds.
3	<b>QUIET/ POSSIBLY SHY</b>	<b>Comes up for food can tolerate presence at a close distance</b> -Can suit small and large operations, easy to handle if other cows are present and can have little to no handling issues.
4	<b>SHY</b>	<b>Prefers some distance between them, does not show aggression</b> -We prefer these animals to be sold with a friend and have less handling when at their new home.
5	<b>VERY SHY/ POSSIBLY AGGRESSIVE</b>	<b>Prefers a large distance can become aggressive if alone or forced</b> -Only sold with a group of mates and to bigger operations. Once in a mob or working with plenty of cows the temperament score may reduce.
6	<b>AGGRESSIVE/ DANGEROUS</b>	<b>Charge when close, prefers to be as far away as possible</b> -These animals are never sold and will be culled.

## THE PROCESS:

### How we assess and when:

- Individual assessment on each animal, including donors and ai sires.
- Animals are physically assessed as close to 200, 400, 600 and 800 days.
- Weights are taken on each assessment date.
- Bulls are semen tested and measured for scrotal circumference and capacity from 14 months of age.
- Internal reproductive tests are completed on females from 14 months of age.
- IMF, EMA, and fat depth scanning is completed and used in conjunction with the assessment.
- Abnormalities, treatments and calving are recorded as needed.
- If any animal scores a 6 in any of the attributes this animal will be an automatic cull.
